

NOME: _____

Data ___/___/___

1. Aplica as propriedades da multiplicação e completa:

$$7 \times (5 + 2) = 7 \times (\quad) = \boxed{\quad}$$

$$(7 \times 5) + (7 \times 2) = (\quad) + (\quad) = \boxed{\quad}$$

$$3 \times (8 - 4) = 3 \times (\quad) = \boxed{\quad}$$

$$(3 \times 8) - (3 \times 4) = (\quad) - (\quad) = \boxed{\quad}$$

$$\boxed{\quad} \times 1 = 4$$

$$0.75 \times \boxed{\quad} = 0.75$$

$$25 \times \boxed{\quad} = 25$$

$$\boxed{\quad} \times 1 = \frac{8}{14}$$

2. Faz as somas dos numerais mistos (vê o exemplo a vermelho).

$1 \frac{2}{5} + 3 \frac{6}{7} = \underline{5 \frac{9}{35}}$	$1 \overset{+2}{\underset{\times 5}{-}} \frac{2}{5} + 3 \overset{+6}{\underset{\times 7}{-}} \frac{6}{7}$	<div style="border: 1px solid red; padding: 2px; color: red; font-size: small;">Transforma em frações impróprias.</div> <div style="border: 1px solid red; padding: 2px; color: red; font-size: small;">Encontra o m.m.c. dos denominadores.</div>
	$\frac{7}{5} \overset{\times 7}{\times 7} + \frac{27}{7} \overset{\times 5}{\times 5}$	
	$\frac{49}{35} + \frac{135}{35} = \frac{184}{35} = 5 \frac{9}{35}$	

$$5 \frac{2}{5} + 4 \frac{1}{2} = \underline{\quad}$$

$$2 \frac{1}{3} + 6 \frac{3}{5} = \underline{\quad}$$

$$6 \frac{3}{4} + 1 \frac{6}{7} = \underline{\quad}$$

$$2 \frac{3}{7} + 2 \frac{1}{6} = \underline{\quad}$$
